

SOS

Strike Out Stroke is a national campaign that includes a primary school program, fighting to reduce the prevalence of stroke in our communities.

We aim to ensure that those struck by stroke receive timely treatment by raising the awareness of **B.E. F.A.S.T.**

1 in 6 Australians will experience a stroke.

30% of strokes occur in people under the age of 60.

64% of Australians experiencing a stroke do not arrive at an appropriate care facility in time for critical treatment.
